Five ways to wellbeing

It's important to look after our mental health and well-being.

These five ways to well-being are a great resource to use everyday as we go about our daily lives:

CONNECT: Stay in touch with friends and do activities with loved ones.

GIVE: Draw a picture or write a poem for a loved one. Help around the house with chores.

NOTICE: Go for a walk in nature and look at as many things as you can, describing them or maybe drawing or taking pictures.

BE ACTIVE: Dance to your favourite music, go on a bike ride or a walk.

LEARN: Young people are constantly learning at school; however there are also lots of activities and hobbies you can try to spark their interest.

Emotional health & wellbeing tip

Worries may surface for young people when returning to school after the summer break.

Visualisation can help distract from the worry and concentrate on something else. Visualising being by the sea is a great tip to distract yourself.

Try some of these to really visualise the sea:

- What kind of things can you **see**?
- What can you **smell**?
- What can you **feel**?
- What can you **hear**?
- What can you **taste**, that reminds you of the seaside?

Sleep

After the school break, young people's sleep might be effected due to the difference in routine.

Health for Teens has some great tips to retrain your sleep:

- Don't drink caffeine towards the end of the day.
- Relax before bedtime.
- Stick to regular bedtime and wake up times.
- Keep regular mealtimes.
- Get active.
- Avoid devices such as phones, tablets, computers and game consoles.
- Share your worries.
- Have a good place to sleep.

How your day affects your sleep | Health For Teens

Herts Haven Café

Herts Haven Cafés offer drop-in space for children and young aged 10 – 18 years old across Hertfordshire.

These sessions enable young people to access support for their emotional wellbeing.

Their main goal is to create a non-judgemental environment where young people feel comfortable sharing their concerns.

Why not go and check them out? Further information can be found on their website.

think measles

It's not just a kids' problem

Teenagers, young adults and anyone who has missed their MMR vaccination can get measles.

Symptoms such as:

- high fever
- rash – sometimes starting around the ears
- sore red eyes
- cough
- aching and feeling unwell

Remember, if it could be measles – they need to be in an area where they cannot pass the infection to vulnerable patients such as the immunocompromised and pregnant women.

ORAL HEALTH FOR YOUNG PEOPLE

WHAT IS TOOTH DECAY?

Tooth decay is when the hard outer surface of a tooth is broken down or damaged by bacteria and acid making holes in the teeth, called cavities. Tooth decay can cause pain, and infections, and problems with eating, speaking, playing, learning, smiling and socialising.

Tooth decay occurs when foods and drinks with sugars and starches are left on the teeth.

WHERE TO ACCESS A DENTIST

Scan the QR code or search "Find a dentist" for the NHS website.

Dental care is free for children and young people aged 0-19.

HOW TO BRUSH

REDUCE THE RISK OF TOOTH DECAY

- Brush teeth twice a day with fluoride toothpaste - no rinsing
- You should see a dentist at least yearly
- You should have fluoride varnish at each visit, this is free to all young people
- Use fluoride toothpaste containing between 1,350 ppm and 1,500ppm of fluoride
- Clean in between your teeth every day using floss or interdental brushes

TOP TIPS ✨

- Brush teeth morning and bed-time for 2 minutes with fluoride toothpaste
- Only use a pea-sized amount of toothpaste
- Spit out after brushing and don't rinse - if you rinse, the fluoride won't work as well
- Fizzy drinks, fruit juices and sugary snacks should be limited to meal times

- Brush to the beat - why not download the Brush DJ app and brush to your favourite song? ✨
- Set reminders and timers on your phone
- Go electric with an electric toothbrush
